

Bulgarian State Railways Sleeper Department

Sleeper Department *was proud to present*

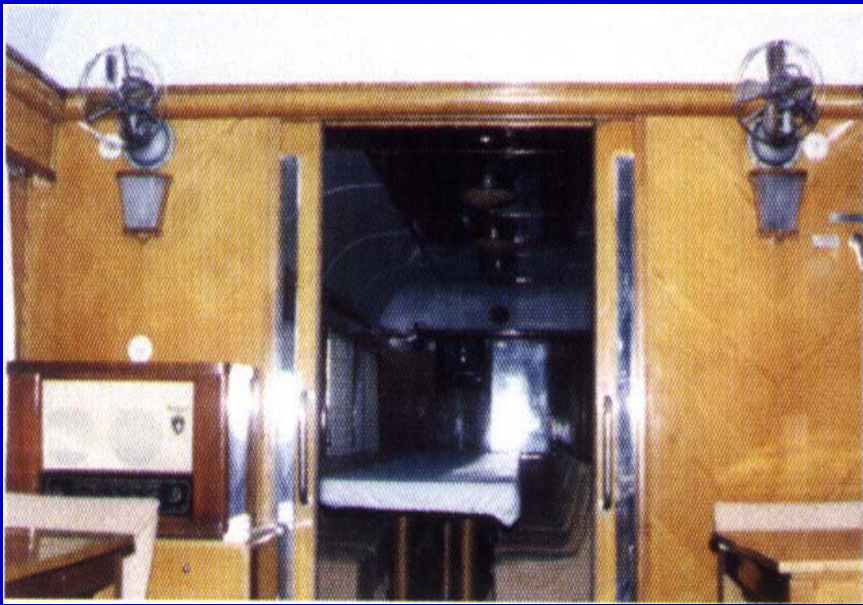

"The Crown" Express

The "CROWN" Express train is made up of special carriages only and saloon-cars for various functional purposes. It offers comfortable furniture and conditions, and services of high quality rendered by elite staff for luxury, official, business, tourist, jubilee and attraction tours and travels, for limited number of passengers.

Since 1866 small rolling stock of saloon-cars is continuously maintained, especially destined for the so called "Supreme" traveling of monarchs and heads of state , as well as of their entourage.

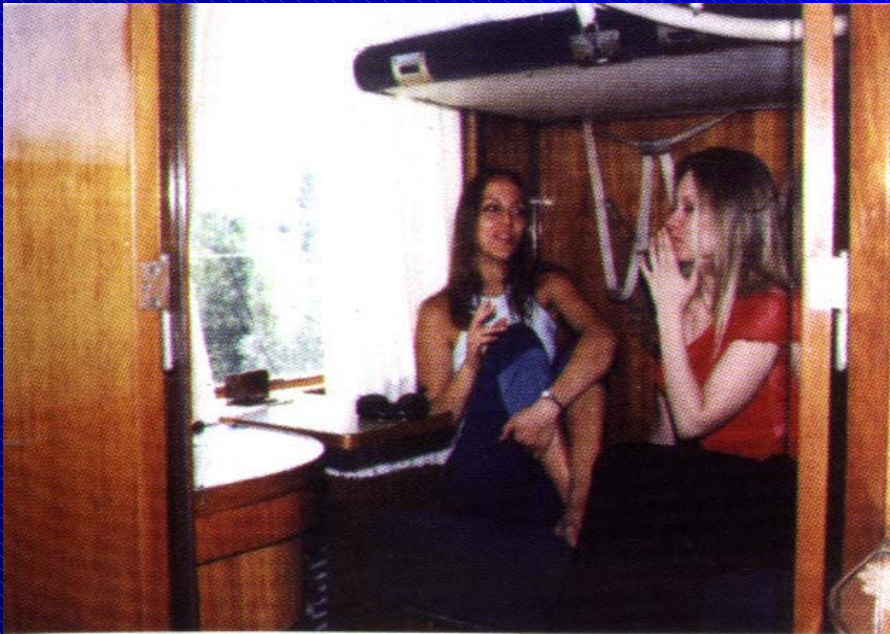

Today, the Bulgarian State Railways have at their disposal a number of carriages delivered from Germany during the period from 1938 to 1942. These cars are particularly precious due to their furnishing of the epoch before the Second world war and improved dynamic rolling features ensuring high comfort during traveling. Among them are the cars specially destined to be used at first by King Boris 111, Queen Joanna and Prince Cyril, respectively No.50, No.51 and. 52.

The train offers furnishing and conditions of a contemporary design, perfect energy supply, audio- and video-technical equipment, up-to-date furnished kitchen-car, restaurant-car and a carriage for transportation of motor cars.

The single and double sleepers have convenient communication with toilets, a luxury not typical of the time yet entirely corresponding with the current fashion.

The "Crown" Express train is being made up for each occasion with special cars and saloon-cars, the number of which, their kinds and arranging of the train cars, is done always according to the wish of our clients.

The elite CROWN Express gives the affiliates of luxurious voyages all grounds to call it "a pearl in the crown".

Sleeper Department has
the pleasure to present you
"Vitosha Express"

The elite train **VITOSHA-EXPRESS** was built in 1975 in the plants „Bautzen and Goerlitz“, East Germany. After its delivery in Bulgaria, **Vitosha-Express** was designed to cater for the traveling of the political persons along with their entourage

"Vitosha Express"

- Ten special modern designed cars offer comfortable traveling and service of a high quality to the passengers.
- Two luxury sleeping cars are designed with a lounge to accommodate ten guests.

Along with them the train is supported with two apartment type cars and comfortable kitchen lounge of full value.

The main apartment and two sleeping cars designed to the separate couples have modern offices and lavatory at its disposal.

Double-sleeper

Single sleeper

Vitosha-Express is remarkable for its up-to-date restaurant car with 36 seats. The kitchen offers various dishes. Head office of the train equipped with telephone exchange has to be build to the set of the lounge cars for connection to outside subscribers. The distance between them is of no importance.

Vitosha-Express offers to its clients interesting routs to the different towns troughout the country like Plovdiv, Varna, Veliko Turnovo and others.

The train has autonomous energetic supply, air-conditioning, audio and video equipment and separate car to transport the passengers' automobiles.

Vitosha-Express can gain speed of 160 km/h and is up to the requirements of comfortable traveling.

**The First operational
locomotive with steam engine
,property of BDZ**

For more attractive traveling it can be used a locomotive with a steam engine

Steam locomotive № 15.215, which nowadays is an operational museum exhibit, was manufactured in Germany some 60 years ago by Schwarzkopf Locomotive Works in Berlin

In 1986 this locomotive No 15.215 was restored in Bojchinovci, and was rendered into operational condition. It was used for a number of jubilee and attraction journeys, as well as for a number of films, produced by Bulgarian and foreign film studios

**Thank you to be our gests at this little ride
